

QUICKSTART

Local Dev Environment

5 steps · about 10 minutes

Before you start — Docker, Node 20+, and a GitHub account.

1

Clone the repository

```
git clone https://github.com/org/app.git
```

2

Install dependencies

```
npm install
```

3

Copy environment variables

```
cp .env.example .env
```

4

Start the dev server

```
npm run dev
```

5

Open the app

Visit localhost:3000 — you should see the welcome screen.
