SKILLS

- Python
- Go
- PostgreSQL
- Kafka
- Docker
- Kubernetes
- AWS
- gRPC

EDUCATION

B.Tech, Computer Science
NIT Trichy · 2019

SUMMARY

Backend engineer with six years building high-throughput payment and messaging systems. Most recent work focused on cutting p99 latency on a checkout service by 40% through targeted caching and query restructuring.

EXPERIENCE

Senior Backend Engineer 2022 — Present
[Meridian Payments](#)

- Led migration of the settlement pipeline from batch to event-driven processing on Kafka.
- Reduced checkout p99 latency from 640ms to 380ms via read-path caching.

Backend Engineer 2019 — 2022
[Northwind Logistics](#)

- Built the tracking-event ingestion service handling 2M events/day.
- Introduced contract testing between 6 internal services, cutting integration bugs by half.
